Professional Summary

Informatics Engineering graduate with experience developing web applications using Laravel, PHP, MySQL, JavaScript, and Next.js. Built information systems for healthcare, recommendation, and monitoring use cases, with a focus on backend development, database design, and application architecture. Experienced in developing public information systems and managing government datasets during an internship at the Semarang Communication and Information Office. Eager to contribute to software development teams and continuously improve technical expertise.

Professional Experience

Internship - Dinas Kominfo Kota Semarang Jan 2025 – Feb 2025
Government Agency Responsible for Public Information Systems and Digital Services

- Contributed to the rebranding and redevelopment of the WisSemar tourism website using Next.js, Bootstrap, HTML, and CSS to improve user experience and modernize the platform's interface.
- Collected, validated, and managed GIS records for 600+ schools across Semarang, improving data accessibility for municipal information systems.
- Built responsive user interfaces supporting multiple device resolutions and screen sizes.
- Collaborated with government stakeholders to align platform functionality with public information requirements.

Education

Universitas Dian Nuswantoro - Bachelor of Informatics Engineering Aug 2022 - Feb 2026
GPA: 3.41 / 4.00

Projects

Hospital Information System

- Developed a web-based hospital management system using Laravel, PHP, MySQL, and Bootstrap.
- Implemented patient management, healthcare service, and administrative modules to streamline hospital operational workflows.
- Designed relational database structures and backend functionalities to support efficient medical information processing.
- Applied MVC architecture to improve maintainability and scalability of application components.

Gifty – Gift Recommendation System

- Developed a gift recommendation web application using Laravel and MySQL.
- Implemented filtering and preference-based recommendation features to help users discover suitable gift ideas.
- Designed responsive user interfaces optimized for desktop and mobile devices.
- Structured application logic and database schemas to support future feature expansion.

Basket Monitoring Application

- Developed a basketball player monitoring platform using Laravel, PHP, and MySQL.
- Developed performance tracking and statistical analysis features that enable coaches and team managers to monitor athlete development and compare player performance metrics.
- Designed database structures for efficient storage and retrieval of player information.
- Created dashboard interfaces to improve visibility of athlete performance data.

Hirakata Learning Application

- Built an educational web application for learning Hiragana and Katakana characters.
- Built interactive learning modules for Hiragana and Katakana practice, enabling users to learn Japanese characters through structured exercises and responsive web interfaces.
- Implemented responsive UI components using modern web technologies.

- Organized educational content into structured and accessible learning workflows.

Certifications

BNSP Certified Web Developer

LSP Universitas Dian Nuswantoro (UDINUS) | April 2026

English Proficiency Assessment (CFLT) – Score: 483

Center for Foreign Language Training (CFLT), Universitas Dian Nuswantoro | Jan 2026 – Jan 2028

AI Literacy for Everyone: Understand, Apply, Create

BASS Training Center & Consultant | October 2025

Internship Certificate

Department of Communication, Informatics, Statistics and Cryptography of Semarang City | January 2025 – February 2025

Skills

Languages: PHP, JavaScript, Python, SQL, C++

Technologies: Laravel, HTML, CSS, Bootstrap, Next.js, MySQL

Soft Skills: Time Management, Adaptability, Fast Learn, Problem Solving
